# JOHNNY K

The romantic notion of place is fully embraced by Johnny K in his latest exhibition of paintings. These sublime depictions of the Australian landscape are an evolution - the new vision emerging in the tradition of great Australian landscape painters.

Based on field trips out to Hartley Vale, Tarana, Kanimbla, Megalong Valley, Oberon, O'Connell, Bathurst and Orange, where the views are expansive and the horizons endless. Johnny's work lures you into the landscape, as you stare into the distance and let your imagination run free to ponder the miracle and gift of life.

Johnny's bold colour palette and material choices, along with his unique technique and talent create a rare combination of beautiful contemporary art built on traditional foundations. These works are more than a depiction of the artist's love affair with the land. These are paintings of love - loaded with passion, emotion and positivity.
